

VISUAL ARTS DIARY

OVERVIEW: 3 ART TECHNIQUES FOR A VISUAL ARTS DIARY

There are many techniques in art that you can explore, however, we're focusing on developing your skills using techniques that suit a visual art diary (VAD).

The most common art techniques that suit a visual arts diary include:

- Collage
- Drawing
- Painting

Learn how to explore these techniques by using some of the below art technique prompts in your visual arts diary.

COLLAGE

COLLAGE is a popular art technique based on the assemblage of various art techniques and various mixed media materials.

Collage helps you build a story in your artwork using base materials.

TASK: Create a collage in your VAD to tell a story about you.

Include favorite images, shapes, words, colors, and patterns in your story.

DRAWING

DRAWING involves the process of mark making using art materials such as pens, pencil graphite, charcoal or digital drawing using a stylus.

TASK: Create a drawing in your VAD that focuses on a subject that you want to improve with your drawing skills. Your task will represent a recording of your skills right now!

PAINING

PAINING: includes a variety of paint materials (acrylic, oil, water etc) that involves wet based materials instead of dry based materials.

TASK: Create a painting in your VAD. Use a limited number of colors and shapes in your artwork and develop a cohesive idea on your page.
